SKILLS

NextJS - ReactJS - TailwindCSS - Javascript (ES6) - Typescript - HTML - CSS - NodeJS - Express Storybook

EXPERIENCE

FrontEnd Developer at Nooco — March 2023 - Sept. 2023 - *Internship*

Tech used : JS - React - Jsx - CSS - Redux - Storybook - Jira

Nooco is a web application designed to calculate the carbon emissions for any type of construction project

- Bug Resolution and UI Improvements: Efficient correction of user interface bugs and implementation of ergonomic changes.

- Development of New Features: Active participation in adding innovative features and improving user experience.

- Contribution to an Internal UI Library: Participation in the development of a user interface library, enhancing code consistency and reusability.

- Experience in Agile Methodology: Active participation in Agile sprints, close collaboration with the product team, and use of JIRA for project management.

SOME OTHER PROJECTS

MujiLab, a little personal project made with NEXTJS & Tailwind CSS

Offering various services through this site, combining my skills in web development and graphic design.

Artwork & Design created by me.

Application (Desktop & Mobile responsive) / **Github**

SLI (Logistics Company Project)

I developed a full-stack application using NEXTJS, Tailwind and a MySQLdatabase.

In summary, the client can log in to their account and create a shipping label via a form that calculates the shipping cost based on the type/weight/number of parcels or pallets. Form then exported as a PDF file.

Artwork & Design done by me.

Application (Desktop & Mobile responsive) / **GitHub**

EDUCATION

Ironhack - Web Developer Bootcamp **-** *Bac +3 / License / Bachelor - 2023*
